

NIDHI BARHATE

Senior Backend Engineer | Senior Backend & Platform Engineer | Enterprise Integrations | Security & Identity Systems | Java Microservices

+91-9033812654 | nidhi.barhate12590@gmail.com | linkedin.com/in/nidhi-barhate

PROFESSIONAL SUMMARY

Backend engineering professional with 11+ years of experience designing scalable enterprise SaaS applications, distributed backend systems, and secure authentication platforms. Strong expertise in Java, Spring Boot, microservices architecture, API security, Keycloak, OAuth2, SAML, JWT, and cloud-integrated systems. Experienced in modernizing legacy applications, building reusable backend frameworks, improving engineering workflows, and leading technical initiatives across enterprise environments. Hands-on exposure to AWS, Kubernetes, event-driven systems, and AI-assisted engineering practices.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring MVC, Hibernate, REST APIs, Microservices

Security: Keycloak, OAuth2, SAML, JWT, Authentication & Authorization, API Security

Cloud & Platform: AWS, S3, DynamoDB, Lambda

Messaging: RabbitMQ, ActiveMQ, WebSocket, AMQP

Database: MS SQL Server, MySQL, SQL Optimization

Engineering: Distributed Systems, Scalability, System Design, Performance Optimization

PROFESSIONAL EXPERIENCE

Accenture - Custom Software Engineering Senior Analyst | Jun 2024 – Present | Pune

- Designed and implemented enterprise-grade authentication and authorization platform using Keycloak and JWT-based access management.
- Led backend engineering initiatives focused on scalable microservices architecture, secure API development, and cloud integration.
- Integrated AWS services including DynamoDB, S3, Lambda, and Secrets Manager for resilient enterprise application workflows.
- Contributed to modernization of legacy applications by refactoring monolithic services into modular backend components.
- Implemented WebSocket-based communication capabilities for real-time enterprise application features.
- Collaborated with infrastructure teams on Terraform and cloud deployment automation concepts
- Mentored developers through architecture reviews, debugging sessions, and engineering best practices.
- Built AI-assisted engineering proof-of-concepts to improve development productivity and delivery efficiency.
- Proactively supported delivery timelines through technical leadership, issue resolution, and cross-team coordination

eProcurement Technologies Ltd - Technical Lead / Software Developer | Jan 2022 – May 2024 | Ahmedabad

- Led backend development and technical delivery for enterprise procurement and workflow management platforms.
- Collaborated with business analysts and stakeholders to translate complex requirements into scalable backend solutions.
- Designed backend modules, service integrations, and database schemas with focus on maintainability and performance.
- Provided technical leadership during production issue resolution, code reviews, and mentoring activities.
- Worked with RabbitMQ and ActiveMQ to support asynchronous communication and event-driven workflows.
- Promoted to Technical Lead based on engineering ownership, technical contribution, and delivery excellence.

Omnirio - Software Developer | Mar 2019 – Jan 2022 | Pune

- Developed scalable backend services and REST APIs for omnichannel retail and e-commerce SaaS platform.
- Built modules supporting Order Management, Inventory, POS integrations, Notifications, Marketplace integrations, and Carrier services.
- Implemented asynchronous messaging solutions using RabbitMQ and AMQP-based communication.
- Optimized backend workflows, database queries, and service interactions for scalability and reliability.
- Developed chatbot integrations using Node.js and contributed to NLP experimentation using RASA.

MSP IT Concepts — Software Engineer | Aug 2015 – Mar 2018 | Ahmedabad

- Developed SaaS-based applications and backend modules for influencer marketing and CRM platforms.
- Integrated payment gateways and multiple third-party APIs including social media platform integrations.

- Built reusable backend automation tools to improve operational workflows and platform administration.

Bugle Technologies Pvt Ltd — Junior PHP Developer / *Dec 2013 – Jun 2015 / Ahmedabad*

- Developed backend functionalities and JSON-based integrations for SaaS publishing applications.
- Worked on AJAX-driven workflows and frontend-backend interaction handling.

EDUCATION

Bachelor of Engineering (Computer Engineering) — Dharmsinh Desai University, Gujarat

CERTIFICATIONS

- Prompt Engineering for ChatGPT
- Reinvention with Agentic AI
- Python Programmer Track
- Deep Learning in Python
- Natural Language Processing Fundamentals in Python
